International Journal of Fracture

CONTENTS OF VOLUME 45 (1990)

Vol. 45, No. 1, 1 September 1990

Plastic η-factor (η_p) of fracture specimens with deep and shallow cracks	SHANG-XIAN WU, YIU-WING MAI and B. COTTERELL	1
Mixed mode fracture initiation and trajectory prediction under random stresses	M. GRIGORIU, M.T.A. SAIF, S. EL BORGI and A.R. INGRAFFEA	19
A new approach of three-dimensional strength theory for anisotropic materials	S.C. TAN	35
A finite element method for determining the angular variation of asymptotic crack tip fields	M. SYMINGTON, M. ORTIZ and C.F. SHIH	51
A mixed hybrid finite element for three-dimensional elastic crack analysis	M. KUNA and M. ZWICKE	65

Vol. 45, No. 2, 15 September 1990

Analysis of frames containing cracks and resting on elastic foundations	M.H. EL-HADDAD, O.M. RAMADAN and A.R. BAZARAA	81
Large crack tip opening in thin elastic–plastic sheets	C.L. HOM and R.M. McMEEKING	103
Determination of the dynamic stress intensity factor of a moving crack by a numerical method	C.R. CHIANG	123
Mismatched elastic connections	HUAJIAN GAO	131
R-curve thermodynamics revisited	J.S. SHORT and D.W. HOEPPNER	145

Vol. 45, No. 3, 1 October 1990

Treatment of singularities in cracked bodies	K.N. SHIVAKUMAR and I.S. RAJU	159
Dynamic fields near a collinear macrocrack-microcrack configuration under antiplane impact loading	CH. ZHANG	179

Influence of strain softening on the fracture of plain concrete beams	H. ANANTHAN, B.K. RAGHUPRASAD and K.T. SUNDARA RAJA IYENGAR	195
Plane stress finite element prediction of mixed-mode rubber fracture and experimental verification	R.M.V. PIDAPARTI, T.Y. YANG and W. SOEDEL	221

Vol. 45, No. 4, 15 October 1990

Plane-strain mixed-mode near-tip fields in elastic perfectly plastic solids under small-scale yielding conditions	P. DONG and J. PAN	243
A hybridized displacement discontinuity and indirect boundary element method to model fracture propagation	HCM. CHAN, V. LI and H.H. EINSTEIN	263
Estimating the toughening effect of crack-bridging particles in a brittle matrix	E. SMITH	283
The improved D-M model solutions for single edge cracked plates by considering the yielding at the back side	LU YINCHU and GUO CHANGQING	299
Photoelastic and theoretical analyses of cracked frames	S. ABDEL-SALAM and M.H. EL-HADDAD	311

International Journal of Fracture

CONTENTS OF VOLUME 45 (1990)

Vol. 45, No. 1, 1 September 1990

Meetings calendar		R2
Mode III stress intensity factors for concentrated force at an arbitrary point	JIANG CHI-PING	R3
The SIF solutions for two semi-infinite cracks and an external penny-shaped crack between two different media	WEN PI-HUA	R9

Vol. 45, No. 2, 15 September 1990

Meetings calendar		R15
A study of *J*-controlled crack tip deformation fields	J.M. GOAN, M.A. SUTTON and YUH J. CHAO	R17
The effects of interfaces on propagating crack	X.D. WANG	R23
A note on the use of eta factors to describe the *J* integral for an elastic solid	E. SMITH	R27

Vol. 45, No. 3, 1 October 1990

Meetings calendar		R32
New integral equation for curved crack problem in antiplane elasticity	Y.Z. CHEN	R33
A method for calculating stress intensity factors of chevron-notched three-point bend round bars	WANG QIZHI and XIAN XUEFU	R37

Vol. 45, No. 4, 15 October 1990

Meetings calendar		R44
Relationship between local and global characterizing parameters of stress triaxiality constraint in crack tip regions	SUN JUN	R45
Note on the path-independent integral for bi-material bodies	S.I. CHOU	R49

AUTHOR INDEX, VOL. 45 (1990)
